

(Bulletin 10-29-2013 from Micro 100 Marketing)

NEW PRODUCTS

"TANG" Tangential Blades

"PZ-1" Slitting Blades

Micro 100 is pleased to introduce two new specialty tools. The solid carbide construction provides long lasting cutting performance in specialty applications.

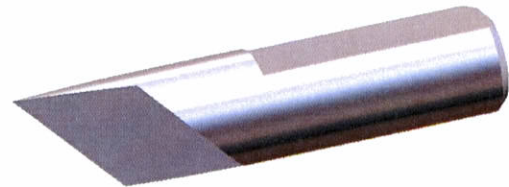

- * The **TANG** Tangential Blades are a new catalog offering, found on page 119, and is sold in three sizes; cutter angles of 40, 50 and 60 degrees.

(Formerly part number ZA50404)

- * The **TANG** Blades are suitable for sign makers, sail makers, leather cutting and rubber raft parts cutting applications.

- * **TANG** blades all have .250" shanks.

- * Micro 100 can quote you this style of tooling in special dimensions as required.

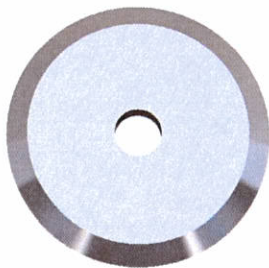

- * The **PZ-1** Slitting Blades (formerly part number ZA70803) are a new standard catalog offering, found on page 119, and comes in one size of 28mm diameter.

- * The **PZ-1** Slitting Blades are suitable for sign makers, sail makers, leather cutting and rubber raft parts cutting applications.

- * Micro 100 is always ready to quote you this style of tooling for your special dimensional callout needs.

- * Stock is available (subject to prior sale) for all of these standard catalog items.

If you have further questions about our NEW Tangential and Slitting Blades, please contact the Micro 100 Customer Service Team and they will be happy to assist you.
